MONTHLY DX ACTIVITY AWARD

The activity award was started July, 1985.

The purposes of this award are to stimulate DX activity by SCDXC members, increase the reporting of DX on the Club repeater, and offer encouragement to members that there is still a lot of DX to be worked. Here are the rules,as they were printed last year,along with a sample log you will find enclosed with this Bulletin.

The monthly winner will be the club member who works the most countries. Two points are obtained by working a country for the first time in a month on either phone or cw. For example, the first contact with Japan on phone counts two points and the first contact with Japan on CW counts two additional points. One additional point can be obtained for each two point contact by announcing the station on the club repeater either before making the contact or immediately after the contact. Your log must indicate the time of the repeater announcement. Note: If you are unable to bring up the repeater, use the output frequency simplex. Not everyone can access the repeater at its new location.

There is a new contest every month. The month is determined by GMT time. The ARRL DXCC country list is used. Mark two or three points, as appropriate, on the country check list when a new mode-country is worked.

Continued Page 3

MINUTES OF THE JULY 10, 1986 MEETING

By Russ Mason, KG6IP, Secretary

The meeting was brought to order by N6CGB at 8 PM. There were many positive comments made on our new meeting place at the Children's Hospital in Hollywood.

Self introductions were given. KB6FXS was a visitor. NZ6N became a new member, WN6J became a full member, and WD6DXU made the DXCC Honor Roll.

A pointed discussion took place over the repeater and our monthly contests. Many members cannot access the repeater from their location. The membership present agreed that an announcement made on the output would be acceptable.

Edgar, N6OU, gave the treasurer's report. Income was $3,350 ($3100 from the Convention). Expenses were $621.41 .

John, K6SVL, commented that the number of Monthly Activity reports were far from what they should be. Please send your reports to John. Congratulations to Ted, W6HX, for his activity in June!!

K6DDO announced that KX6DS would be visiting Los Angeles soon. A sign-up sheet was passed around for those who would like to get together for dinner.

Dan, N6CGB, read an excerpt about the Long Island DX Association and how they disseminate information and make repeater announcements.

Ted, W6HX, suggested that those members who were interested in getting together for dinner before the September meeting meet at the Spaghetti Factory at 5:30 PM.

Fred, WA6WZO, commented about the possibility of an antenna ordinance for Los Angeles county. Please keep your ears open. A poll was taken regarding the proposed Novice enchancement and the issuance of call signs by the league.

Steve, W6FRZ, introduced Bob, K6RR, wwho presented information on the new repeater site and the much-needed modifications for the repeater. Steve then gave a slide presentation on the site plus past and present "Big Guns" of the SCDXC.

The Mystery Guest was K6DDO who was greeted by KG6IP.
The raffle drawing winners were : W6AUG, WA6POZ, W6EA, N6IC, KB6FXS, KB6DXN, W6AE, W6VZZ, WA6RAT, and K6AE.

The raffle prizes were procurred from HRO in Anaheim and WR6M, Kazu, from Kenwood.

There were 56 in attendance at this meeting.

****

WELCOME NEW MEMBERS

Randy Powell, NZ6N

*

Congratulations to Nick Winter, WB6DXU, who recently made the DXCC Honor Roll.

*

The September meeting will be back at the Children's Hospital, 4650 Sunset Blvd., Hollywood.

MONTHLY DX ACTIVITY AWARD (Cont'd from pg. 1)

Be sure to add your name, call, and claimed monthly total score to the country check list.

All modes will count but only as phone or cw. For instance, modes such as RTTY, ASCII, or AMTOR which take place in aa cw only segment of the band will count as cw. Modes such as SSTV of FAX which take place in a phone only segment of the band will count as phone. CW always counts as cw since it is authorized in all segments of the band.

Contacts on the new WARC bands and thru OSCAR satellites will count for this award. Contest contacts will count for this award but only in the single operator class from your own station. All contacts must be made from your own fixed, portable, or mobile station while operating in southern California.

A photocopy of your log, clearly indicating the claimed DX contacts and repeater announcements, together with the country check list must be sent to the Contest Chairman, K6SVL, by the 15th of the following month. The winner will be announced in the following month's Bulletin. (Provided they are sent to the Editor by the 30th -ed)

W6AM MEMORIAL DX ACTIVITY AWARD

The rules for this award are identical to those for the Monthly DX Activity Award except the span of time will be one calendar year instead of one month. Phone and cw contacts plus repeater announcements could lead to a maximum of six points per country worked. It is not necessary to win any of the Monthly DX Activity Awards in order to win the annual W6AM Memorial DX Activity Award.

SWAP MEET SURPRISES by Marty Woll - N6VI

Have you bought something at a swap meet because you know you can use it for something some day? Or perhapts it was attached to something else you need and you hate to just throw it away? Either way , you may need specifications on the device in order to make use of it (or even test it to see if it's good). Most swap meet goodies don't come with spec's, but a page or two out of the manufacturer's catalog or data sheets can be just the ticket.

Fellow club members employed as engineers have been able to procure such information for me in the past (tnx to N6IC, N6CGB, K6YUI, K6AC and others). I have even had success in writing direcly to the manufacturers.

My present supply of literature includes Amphenol, Belden, Centralab, Dowkey, E.F. Johnson, Hammarlund, ITT-Jennings, Phelps-Dodge (now Celwave) , Potter & Brumfield, RLC, Standard, and Johnson. If you need some help with any of these products, let me know. I am presently looking for data on a Microwave Associates ferrite circulator, model MA-7K233. I also need manuals (to copy) on a Hewlett Packard 400D AC voltmeter, 430C microwave power meter and 606A signal generator.

Any help will be appreciated .
